

PERMALIFE Cell Culture Bags

The OriGen **PERMALIFE** bag is intended for use in cell culture and in protecting, storing and freezing cells and tissues.

Cell Culture and Cell Expansion Cryopreservation

The single-use disposable bag that provides a high-quality, scalable solution for your cell therapy needs.

CHEMICALLY INERT AND SCALABLE

The PermaLife bag is made of inert Fluoro-ethyl polymer (FEP), which contains no plasticizers or chemical residuals, and is available with scalable working volumes from 10ml to 3000ml.

GAS PERMEABLE, WATER IMPERMEABLE

PermaLife bags are gas permeable and provide a high rate of oxygen, carbon dioxide, and nitrogen transfer to cells under culture*. The bag is water impermeable, so water loss from cell cultures is negligible.

EXCELLENT OPTICAL CLARITY

The PermaLife bag is transparent, allowing observation of the cell culture under a microscope without risking contamination of the culture.

STERILITY OF CELL CULTURE**

Swabbable, needle-free valves are provided on every bag to preserve sterile access and reduce the chance of needle sticks. The bags have one female luer and one needle-free valve***.

OUR QUALITY STANDARDS

A Certificate of Conformance (CoC) is included with each PermaLife bag. OriGen's PermaLife bags are CE marked and FDA 510(k) cleared. OriGen is certified to ISO 13485:2016, MDSAP certified, and all products are manufactured to GMP guidelines.

*Permeability has been provided by the manufacturer of the film and has been verified by OriGen on a sample of FEP.

**Sterility of the culture is dependent on appropriate use of aseptic technique.

*** The PL07-2G only has one port with one needle-free valve.

PL2000P2-2G	3000	45	45.7

*Non-stock product

ORDERING INFORMATION:

Sterile, for single use only. To place an online order, please fill out [this form](#).

CUSTOMER DRIVEN PRODUCT DEVELOPMENT PROCESS

OriGen Biomedical is able to develop unique products that meet the requirements of your application. This is done through the OriGen [Customer Driven Product Development Process](#), providing you with solutions tailored to your specific needs. Product configurations which include different connectors and cap materials, multi-port connections, SCD tube sets and more are available. Let OriGen know how we can help improve productivity. Minimum quantities apply. You can expect to receive products within 17-24 weeks from the receipt of a Purchase Order.
